

## JLG Telehandler Attachments

JLG Attachments - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their trip, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a substantial marketplace for a product that could quickly and safely lift people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into existing models.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into a range of markets globally and develops new products to make certain clients are capable of being more effective and perform in the workplace within a safer atmosphere.
