

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an intercontinental establishment consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Technologies and Machine Instruments and Computerization Systems.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Additionally, there are more than 90 independent dealers moving lift truck equipment and materials handling equipment. This system helps Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line impressively features 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle models range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift business in the North American marketplace, thanks to their consistency in maintaining a high degree of customer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division located in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Sales of these products were primarily targeted to state-run companies, large scale organizations, and the military. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Daewoo began the first domestic forklift business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of substantial growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to respond to competitive pressures in the US materials handling market. This project greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped set up the business for the manufacture of high added-value goods suited for export. In 1993, the corporation had a international sales network and started exporting models they had established through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
