

Aerial Work Platforms

Aerial Work Platforms - There are lots of accessories for lift trucks that could be utilized in order to help expand the functionality of your lift truck and allow you to pick up stuff, handle materials with greater ease or to finish clean-up tasks.

Some attachments were particularly intended for the forks themselves. For example, fork extensions are utilized whenever you need a lot more blade length, that increases lifting capability. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded attachments are another variety utilized whenever transporting rolled material to be able to make certain it does not roll off of the typical flat blades.

Examples of lifting accessories include pivoting and telescoping boom or crane accessories. They could come in several various styles and are most often designed for transferring metal bars, lumber, poles and various sort of bulky stuff. Additional accessories like different kinds of hooks and hook plates are obtainable in order to pick up stuff utilizing a sling or chain. Magnetic lifters and slab lifters are other items that can be utilized with hook accessories. Slab lifters are specialized accessories that are utilized for carrying a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which connect to your forklift so as to make moving rolls of carpet easier. The attachment connects onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are many different types of forklift accessories that could be meant for facility maintenance like for example snow blades. These blades attach to front end loaders and could move materials like for instance soil, snow and dirt. Other common cleanup attachments comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the forklift blades connect onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up fast and easy.

Material spreaders are other accessories used on lift trucks. These spreaders are useful for a variety of applications like spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Work platforms are another optional lifting attachment that many companies use everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units offered that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location with the use of the lift truck. Larger platform models have additional space for workers so as to bring tools and other necessary items for the task. Often work platforms are constructed of steel or ploy material.
